PROFILE

I'm a creative technologist focused in the physical and digital prototyping with emerging technologies. I come from interdisciplinary backgrounds (engineering, product management and design) and believe in the power of humanity in the computational age.

My current focus is in the power of data and its potentials in the product-based innovations.

SKILLS

HW Prototyping
- Arduino, RaspberryPi
- Hands on Robotics

Computer Vision
- Processing
- OpenCV (Python)
- Unity 3D
- Google ARCore

Web Prototyping
- html, css, javascript
- Three.js, P5.js
- node.js

Machine Learning
- Tensorflow

Cloud Service
- Google Cloud Platform (Firebase, ML platforms)

Product Design
- Rhinoceros, Solidworks
- Keyshot 5

Adobe Series
- Illustrator
- Photoshop
- Premiere Pro

EMPLOYMENT HISTORY

Creative Technologist, Indeed Innovation GmbH

Hamburg Area, Germany

May 2017 — Present

Company Description: Indeed Innovation(http://www.indeed-innovation.com/) is an innovation firm suggesting/implementing a new product or service strategy based on a human-centered design approach. My main roles include :

Client pitching

- Dedicated clients : Lufthansa Technik, Hoyer, GmbH, Henkel AG, Gilson etc.
- Market search, business analysis, project planning

Fast Hardware and Software Prototyping

- Implementing MVP(Minimal Viable Product) to prove the concept
- Quickly learning and applying new API or algorithms for the functional improvement
  - Worked with HW (Arduino, motor control, networking), SW (Real-time object recognition, AR/VR application development)

Installation development for the potential client farming

- Built two interactive installations
  - Brain Piano (2019), How AI will change you(2017)

  Full implementation of the end-to-end development process
  - Developing concept, writing communication materials, technical implementation (SW, HW, System integration)
- On-site demonstrations in the marketing events and conference sites

Project Planner/Software Engineer, Samsung Creative Lab

Suwon, South Korea

Jun 2013 — Oct 2014

Samsung Creative Lab (https://samsungclab.com/EN) is Samsung's incubator project to develop creative ideas into disruptive technologies. My main role in the team included :

- Proposing the winning idea in order to gain entry in C-Lab,
- Development / Marketing : Fast-prototyping (Android SW development), defining products competitive features
- Planning and conducting user research on the hearing-impared community and bringing insights from Quatitative/Qualitative data
- In charging of the progress report to the C-level representatives

Product Manager, Samsung Electronics

Suwon, South Korea

Jan 2011 — Dec 2014

My main role as a product manager in the product strategy team in Samsung Mobile HQ included:

- Responsible for Samsung Galaxy Tablet Series, and Google Nexus 10
- Solving procedual issues during the entire product life cycle development stage to the end of production
- Regular VP/C-level issue reports on the project status
- Responsible for the communication with the cross functional departments.
- Building a product strategy for the sustainable sales growth, defining USPs for the market communication
- Online communication training for local Samsung branches for the coherent communication messages across the world

LANGUAGES

English (Fluent)

Korean (Native)

Japanese (Fluent, C2)

Chinese (Intermediate, C1)

German (Basics, B1)

INTERNSHIPS

Research Intern, ATR (Advanced Telecommunications Research Institute) Kyoto, Japan

Oct 2009 — Feb 2010

Human-Robot Verbal Interaction : Participated in the early development stage of a listener robot for verbal communication with humans, especially in a teleoperation environment.

Research Intern , Toshiba Tokyo, Japan

Aug 2009 — Oct 2009

Human-Robot Nonverbal Interaction: Data visualization of the ”Interest RateY streamed from the Robot

EDUCATION

M.S in Industrial Design, KAIST Daejeon, South Korea

Mar 2015 — Feb 2017

A project member of myDesignLAB (Prof. Daniel Saakes)
Mater’s thesis: Calm Automaton, A DIY Toolkit for Ambient Displays
Full Scholarship : National Science and Technology Scholarship

B.S in Electrical Engineering, KAIST Daejeon, South Korea

Mar 2006 — Feb 2011

Major: Electrical Engineering, Minor: Business Economics
Full Scholarship : National Science and Technology Scholarship

INTERACTIVE PROJECTS & PUBLICATIONS

Brain Composer Nov 2019

Brain Composer explores the possibility of the brain interface to create AI-driven music application and print it into a 30 note music sheet.
(Presented in : The House of Beautiful Business, Lisbon)

How Will AI Change You Nov 2017

How Will AI Change you, provides participants an opportunity to be “A Thinker”, reflecting on personal and collective futures with intelligent machines.
(Presented in : The House of Beautiful Business, Lisbon)

Calm Automaton : A DIY Toolkit for Ambient Displays May 2017

Calm Automaton is a customizable and programmable physical display that gently visualizes abstract data in the pheriphery.
(CHI EA ’17). DOI: https://doi.org/10.1145/3027063.3052968

Ratchair: furniture learns to move itself with vibration. Aug 2016

Ratchair is an interface for displacing big objects by attaching relatively small vibration sources.
(SIGGRAPH ’16). DOI : https://doi.org/10.1145/2929464.2929473

Sketching in virtual reality for rapid and situated idea generation Sep 2015

Cho, MJ., Lee, B, Min, J., Saakes, D.P. Sketching in virtual reality for rapid and situated idea generation In KSDS Fall Conference 2015.

Animal Robot Interaction for Pet Caring Apr 2009

Seung-Hwan Choi, Duckhwan Kim, Joonwoo Kim, Minjoo Cho, ”Animal Robot Interaction for PetCaringY, Computational Intelligence in Robotics and Automation (CIRA), 2009
